Fighting piracy - ISO guidelines for armed maritime guards

As more and more ships navigating piracy-prone waters turn to armed guards for protection, a new set of ISO guidelines for maritime security companies will help ensure the reliability and safety of this response.

How can international standards provide even greater support to the global automotive industry for developing fully networked cars (FNC) integrated with intelligent transport systems (ITS)?

This was the fundamental question explored at the 8th Fully Networked Car Workshop, held on 6 March 2013 at the Geneva International Motor Show, Switzerland.
